Severe Weather Shelter Registration Program

The City of Bixby's Office of Emergency Management has initiated a Severe Weather Shelter Registration Program. This **free, voluntary** program allows residents who own a personal severe weather shelter in the Bixby city limits to register their shelter with the Office of Emergency Management. Shelter registration is part of our effort to be proactive in response to rescue situations that can occur as a result of severe weather.

This program will provide rescue personnel with valuable timesaving location information should a storm shelter exit be blocked by debris or structural damage caused by severe weather.

We have always encouraged shelter owners to include an out-of-town accountability contact as part of their personal severe weather plan. This program provides an additional safeguard against being trapped in a shelter.

To register a storm cellar, Safe Room, or other personal severe weather shelter, contact the Office of Emergency Management at (918) 366-8294. Information recorded will include the owner's name, location of shelter, owner telephone contact number(s), and a brief description of the shelter type and specific location.

This information will be maintained by Emergency Management personnel and used only in the event of structural damage from severe weather or other related incidents.
